📍 Pimpri Chinchwad, Maharashtra, India

EDUCATION

Savitribai Phule Pune University
Dr. D Y Patil Institute of Technology (DIT)

November 2022-July2026 (Expected)
CGPA - 8.75

Bachelor in Computer Engineering

SKILLS

- **Programming Language:** Python, C++, JavaScript, Java, HTML, CSS, MongoDB
- **Frameworks:** ReactJS, NumPy, Tailwind CSS, Media pipe, OpenCV, Godot Engine
- **Domains:** Front-End Development, Designer, UI/UX, 2D Game Development
- **Others:** 2D Animation, Photography, Digital Art
- **Soft Skills:** Time management, Composed, Adaptability, Creative Vision, Teamwork

PROJECTS

- **Portfolio** – [Webpage](#) | [Source Code](#)
A Portfolio showing all my projects, skills, and my **creativity in UI/UX**. Also, **3D model profile** is integrated.
- **XOX - Loop** – [Webpage](#) | [Source Code](#)
A **React.js** Project for Logic Building. The game is similar just like Tic- Tac-Toe. But there's **no such thing as a draw case**, adding a strategic twist, eliminating the possibility of a draw. Here's the twist: when a **player's 4th turn arrives**, the **1st tile** they filled **becomes empty**, adding a new layer of strategy. It isn't just about winning or losing-it's about **thinking ahead, adapting your strategy on the fly**.
- **Poke Dex** – [Webpage](#) | [Source Code](#)
A **React** application, to demonstrate proficiency in **API data fetching, dynamic rendering, and component management**. The app successfully **retrieves and displays** information on **over 10,000 Pokémon** from the Poke API, allowing users to **search and filter** by generation. This project solidified understanding of **React concepts and API integration techniques**.
- **Sign Language Translator** – ML project
A **prototype** which Translates **hand gestures** into English and Hindi using machine learning. **Generates an audio file (MP3)** for output using **Google Text-to-Speech**.
- **Solar System & Constellation** – [Webpage](#) | [Source Code](#)
A **visual representation** of the solar system, allowing **users to click on planets and view detailed information**. **Integrated 88 constellations**, with a **filtering function** to let users explore **constellations by name**.
- **2D Game** – [Link page](#)
A game like Mario. Using **GODOT ENGINE** features like **gravity, Physical Collision, controls are added**.

VOLUNTEER EXPERIENCE

- **ACUNITEX EVENT** - Suggestion for creative ideas and capturing all events in videos and photos.
- **ACES Club** – (Association of Computer Engineering Students) **Position – Content Creator**

EXTRA-CURRICULAR ACTIVITIES

- Led a team as a **Team Leader** and Qualified for **Pre-Finale of SIH 2024 (Smart India Hackathon)**
- Content Creator of ACES Club at DIT

CERTIFICATE

- Certificate by [Association of Computer Engineering Students \(ACES\) for Content Creator](#)
- Certificate by [Great Learning for React JS](#)
- Certificate by [Hacker Rank for solving problems with JavaScript](#)
- Certificate of Hackathon Participation [Vortex Tech Hackathon](#), [Teck Zephyr](#)
