📞 9665542046 | [LinkedIn](#) | [GitHub](#) | ✉ lawhares@gmail.com | 📁 [Portfolio](#)

📍 Pimpri Chinchwad, Maharashtra, India

## EDUCATION

Savitribai Phule Pune University  
Dr. D Y Patil Institute of Technology (DIT)  
Bachelors in Computer Engineering

November 2022-July 2026 (Expected)  
CGPA - 8.75

## SKILLS

- **Programming Language:** Python, C++, JavaScript, Java, HTML, CSS, MongoDB, TypeScript, PostgreSQL
- **Frameworks:** ReactJS, NodeJS, React Native, NumPy, Tailwind CSS, Media pipe, OpenCV, Godot Engine, Git
- **Domains:** Full Stack Development, Designer, UI/UX, 2D Game Development
- **Soft Skills:** Time management, Composed, Adaptability, Creative Vision, Teamwork

## EXPERIENCE

- **LiftupLabs (Start-up)** - [Webpage](#)      **Role - Senior Lead Developer**  
Event management platform enabling seamless event hosting and administration through a guided multi-step creation workflow for online, offline, and hybrid events. It features role-based access control, a powerful admin dashboard with real-time analytics and participant management, and scalable backend APIs with a responsive, production-ready frontend.
- **DIT | Education**      **Role – Web Developer**  
Built a role-based admission and counselling platform with multi-stage workflows, real-time student tracking, and secure authentication. Digitized manual admission processes, improving scalability, accuracy, and administrative visibility.

## PROJECTS

- **CampusCrush** – [Webpage](#) | [Source Code](#)  
**React Native (Expo) mobile app** — anonymous confession feed, swipe matching, real-time chat, user profiles, and notifications. **Tech:** React Native, Expo Router, Node.js/Express, MongoDB, Cloudinary, AsyncStorage.
- **ERP System** –  
Developed a **scalable architected, multi-tenant ERP system** for schools and colleges with role-based access, secure authentication, and **modular academic management**. The platform streamlines student lifecycle management, academic configuration, staff administration, and analytics through a secure, **role-based architecture**, featuring efficient state management, advanced form validation, and interactive analytics dashboards
- **Sign Language Translator** – ML project  
A **prototype** which Translates **hand gestures** into English and Hindi using machine learning. **Generates an audio file (MP3)** for output using **Google Text-to-Speech**.
- **Solar System & Constellation** – [Webpage](#) | [Source Code](#)  
A **visual representation** of the solar system, allowing **users to click on planets** and **view detailed information**. **Integrated 88 constellations**, with a **filtering function** to let users explore **constellations by name**.
- **2D Game** – [Link page](#)  
A game like Mario. Using **GODOT ENGINE** features like **gravity**, **Physical Collision**, controls are added.

## EXTRA-CURRICULAR ACTIVITIES

- Led a team as a **Team Leader** and Qualified for **Pre-Finale of SIH 2024 (Smart India Hackathon)**
- Content Creator of ACES Club at DIT

## CERTIFICATE

- Great Learning - React JS, Python, C++
- Problems Solving - Hacker Rank (JavaScript), GeeksForGeeks - GFG 160
- Hackathon Participation – SIH, Vortex Tech Hackathon, Teck Zephyr, Dev Clash
